

HOLISTIC MESSAGING FOR A CONNECTED SUPPLY CHAIN

Effective communication is the foundation of supply chain success. Whether connecting to a carrier with API or EDI messaging, you're looking for effective, responsive shipment data that can streamline decision-making throughout all parts of the shipment lifecycle.

Enhanced communication via API and EDI protocols is in the backbone of SMC³'s suite of freight visibility and execution products. By providing solutions using both APIs and EDI, SMC³ delivers a range of tools that deliver enhanced carrier connectivity.

Finding the right provider who can service both API and EDI messaging needs is crucial. As a single-source provider for both types of communication, SMC³ augments traditional EDI messaging with visibility and execution real-time API information.

INCREASE SUPPLY CHAIN AGILITY WITH SMC³ LTL APIs

- 

Pricing – Receive contract and volume pricing from an array of carriers at the click of a button.
- 

Dispatch – Automate dispatch or tender requests and receive immediate pick up confirmation.
- 

PRO# Assignment – Instantly assign PRO numbers to shipments at pickup.
- 

Shipment Status – Track in-transit shipments and inventory via real-time messaging.
- 

Electronic Bill of Lading (eBOL) – Digitally transmit shipping information to carriers quickly and securely.
- 

Documents – Access digital documents for proof of delivery, bills of lading, invoice and weight & inspection certificates

MANAGED EDI FOR NO-HASSLE COMMUNICATION

EDI messaging has been around for decades, and the communication standard is pervasive in the industry. SMC³ Integration Services provides an instant EDI infrastructure that supports connections among all TMS providers. Need an EDI connection? There's no need for costly and onerous on-premises EDI implementations.

SMC³'s reliable and secure Managed EDI infrastructure comes with 24/7 monitoring, unrivaled customer service and decades of institutional knowledge. With SMC³'s no-maintenance, cloud-based service, you can:

- Augment EDI messaging with real-time API data
- Scale messaging requirements with ease to serve your growing business
- Secure reliable communications at a fraction of the in-house cost
