SMC³ CONNECTSHIP®

Actualize countless business benefits with ConnectShip LTL powered by SMC³'s Suite of LTL APIs

About ConnectShip

ConnectShip, Inc. is a wholly owned, independent subsidiary of UPS that provides multicarrier shipping software. ConnectShip works with regional, national, and international carriers to provide small package, mail, and LTL shipping solutions. Its on-premise and cloud solutions are utilized by medium to enterprise businesses in any industry. ConnectShip solutions integrate with nearly any business system, such as warehouse management (WMS), transportation management (TMS), enterprise resource planning (ERP), order management, and e-commerce, using industry standard interfaces to provide a centralized platform for managing shipping activities.

About SMC³

SMC³ is the hub for less-than-truckload technology, data and education. SMC³'s hosted technology solutions support the entire supply chain with industry-leading speed, reliability and performance to help optimize LTL freight transportation. As the single integration point for all carrier rate, transit and service information, SMC³ solutions travel beyond simple connectivity and empower shippers, 3PLs and carriers to collaborate and optimize decision making throughout the entire LTL lifecycle — from rating through the invoicing process. SMC³ has a history of industry excellence and business stability, and an unrivaled reputation as a guardian of data security.

SMC³ LTL APIs

SMC³'s API solutions allow freight transportation stakeholders to digitalize the LTL shipment lifecycle from quote to delivery. Through seamless integration, shippers and 3PLs can:

- Receive brokerage, contract and spot market pricing, and transit times, from multiple carriers at the click of a button
- Generate and manage PRO numbers
- Digitally schedule pickups conveniently and quickly, receiving immediate confirmation
- Electronically transmit shipping information to carriers quickly and securely with electronic bill of lading (eBOL)
- Track and trace in-transit shipments via real-time messaging
