

“SMC³ handles the entire lifecycle of an LTL shipment, from rating all the way through the invoicing process.”

*Monica Wooden, CEO
MercuryGate International, Inc.*

Unbeatable Combination: Optimal Transportation Technology and LTL Rating Data

About SMC³

SMC³ is the one-stop knowledge hub for less-than-truckload technology, data and education. The API-powered SMC³ Platform fuels TMS applications with unrivaled LTL analytical capabilities and shipment visibility data. As the single integration point for all carrier rate, transit and service information, SMC³ solutions travel beyond simple connectivity and empower shippers, 3PLs and carriers to collaborate and optimize decision making throughout the entire LTL lifecycle. Thousands of industry trading partners rely on SMC³ solutions to make informed business decisions, achieve higher returns on their transportation investment, and meet ever-changing market demands.

Execution and Visibility APIs

SMC³'s Execution and Visibility APIs provide MercuryGate users with direct-to-carrier connectivity that enables real-time shipment communication and visibility via a secure, private cloud.

MercuryGate users receive the following Execution and Visibility APIs through the SMC³ Platform:

- Imaging — Users have access to a range of shipping documents, providing complete visibility LTL shipments.
- Pricing — Shippers and 3PLs can quickly and accurately access standard contract pricing data directly from their carriers.

RateWare[®] XL

The implementation of the Analytical API solution RateWare XL enables customers to fully realize the advantage of a durable rating engine. Outfitted with a library of more than 3,000 data modules, this robust rating tool simplifies LTL pricing and eliminates the costly tasks of sourcing, programming and maintaining data from multiple carriers. Use RateWare XL to:

- Efficiently manage LTL shipment costing and pricing, including carrier-specific discounts, minimum charges, deficit rating and FAK charges
- Support rating requirements with various lookup and discounting activities
- Incorporate CzarLite base rates

CarrierConnect[®] XL

With CarrierConnect XL, customers can build a custom carrier selection system or an integrated component that runs alongside RateWare XL that will return points of service, transit time and detailed service guide information. The product includes both comprehensive transit data for carriers and the technology to use the data and interface it to supply chain applications. Data updates are automatic, giving users the most up to date and accurate information.

CzarLite[®] XL

Whether shipping in the United States, Canada or Mexico, the CzarLite family of base rates provides a flexible support tool to

ensure total pricing visibility. With CzarLite, users can achieve optimal shipping agreements and:

- Simplify business processes to enhance operating and profitability strategies
- Quickly evaluate the impact of carrier-rate adjustments and conduct base-rate comparisons
- Guarantee shipments are rated using timely, accurate, carrier-independent base rates

- Create a flexible pricing system for shipments between the U.S. and Canada and Mexico
