SMC<sup>3</sup> Data Modules

At the heart of webRater is SMC<sup>3</sup>'s RateWare rating engine, which manages multiple data modules and programs.

SMC<sup>3</sup>'s webRater<sup>®</sup> product is a fast and simple rating tool that enables carriers to use their own website to provide rate quotes to shipper and third-party logistics customers. webRater is also a powerful tool for those customers that need to keep their internal supply chain users apprised of transportation pricing agreements. The webRater solution is designed to be accessed directly from the carrier's website, thereby eliminating the trouble and expense of software distribution to customers.

At the heart of webRater is SMC<sup>3</sup>'s RateWare<sup>®</sup> XL rating engine, a flexible analytical API for transportation pricing management. Logic within the engine controls the management of multiple data modules and programs, which are sensitive to each carrier's individual pricing, effective dates and customer agreements. Because CzarLite<sup>®</sup> base rates can be incorporated into webRater, customers have the ability to get door-to-door rates on shipments moving between the U.S. and Canada, the U.S. and Mexico, and Canada and Mexico.

### Fuel Surcharge

webRater contains both LTL and TL fuel surcharges, automatically determining which designation applies based upon shipment weight. The software also has an option to automatically apply custom surcharge percentage derived by the U.S. Department of Energy's weekly National Average On-Highway Diesel Price.

### Accessorial Charge\*

webRater can use either a single accessorial or multiple custom accessoriels. The single accessorial feature allows customers to adjust the net charge by adding in a specified amount. A system administrator can adjust the accessoriels by selecting only those that apply. The accessorial charges are then added to the net charge and are displayed with the results.

### Multiple Discounts by Weight Break or ZIP

Set up discounts on a ZIP-by-ZIP basis or according to the following weight breaks: L5C, M5C, M1M, M2M, M5M, M10M, M20M, M30M, M40M, MC. A Minimum Charge floor may also be set up.

### Access Code Protection\*

Access codes are required for CzarLite, CanadaLite™ and MexicoLite™ pricing data. An administrator can set or change the access code, thereby controlling who uses the system. Even if there are multiple users with custom discount levels (single or multiple) and rate adjustment factors, the same webRater system will handle the multiple access codes.

## Class/Weight Combination

Carriers can further simplify rating by selecting the number of class/weight entry fields they see. webRater works with one to four class/weight groupings.

If carriers participate in SMC<sup>3</sup>'s CarrierConnect® program, webRater results will also display whether a shipment is direct or indirect for both the origin and destination. Service days will also be displayed.

\*This feature is optional and can be set up by the SMC<sup>3</sup> Web Administrator. All other features can be set up by the webRater administrator at your company.

## Key Feature

webRater provides instant online rate quote power.

## webRater supports these LTL spot pricing characteristics:

- Fuel Surcharges
- Management of Accessorial Charges
- Multiple Discounts by Weight Break or ZIP Code
- Multiple Class/Weight Groupings to Simplify Rating

## Why SMC<sup>3</sup>

SMC<sup>3</sup> is a hub of expertise in the LTL arena. Fueled by heavyweight, analytical APIs, SMC<sup>3</sup> delivers its core competency—LTL pricing expertise—through collaborative pricing technology that supports end-to-end, ongoing predictability in shipper/3PL-carrier relationships. Thousands of North American shippers, carriers, logistics service providers and freight-payment companies rely on SMC<sup>3</sup>'s sophisticated LTL base rates, content, and expert bidding and planning tools to make the best business decisions, achieve higher returns on their transportation investment, and meet the dynamic demands of the market. Through hosted API solutions, SMC<sup>3</sup> supports the entire supply chain with industry-leading speed, reliability and performance. SMC<sup>3</sup>: Investing a lifetime to help optimize freight transportation. To learn more about the SMC<sup>3</sup> industry platform contact SMC<sup>3</sup> today at 1-800-845-8090 or email sales@smc3.com.
