

**HOLISTIC MESSAGING FOR A CONNECTED SUPPLY CHAIN**

Effective communication is the foundation of supply chain success. Whether connecting to a carrier with API or EDI messaging, you're looking for effective, responsive shipment data that can streamline decision-making throughout all parts of the shipment lifecycle.

Enhanced communication via API and EDI protocols is in the backbone of SMC<sup>3</sup>'s suite of freight visibility and execution products. By providing solutions using both APIs and EDI, SMC<sup>3</sup> delivers a range of tools that deliver enhanced carrier connectivity.

Finding the right provider who can service both API and EDI messaging needs is crucial. As a single-source provider for both types of communication, SMC<sup>3</sup> augments traditional EDI messaging with visibility and execution real-time API information.

## INCREASE SUPPLY CHAIN AGILITY WITH SMC<sup>3</sup> LTL APIs

**Pricing** – Receive contract and volume pricing from an array of carriers at the click of a button.

**Shipment Status** – Track in-transit shipments and inventory via real-time messaging.

**Dispatch** – Automate dispatch or tender requests and receive immediate pickup confirmation.

**Documents** – Access digital documents for proof of delivery, bills of lading and other critical shipment information.

**PRO# Assignment** – Instantly assign PRO numbers to shipments at pickup.

## MANAGED EDI FOR NO-HASSLE COMMUNICATION

EDI messaging has been around for decades, and the communication standard is pervasive in the industry. SMC<sup>3</sup> Integration Services provides an instant EDI infrastructure that supports connections among all TMS providers. Need an EDI connection? There's no need for costly and onerous on-premises EDI implementations.

SMC<sup>3</sup>'s reliable and secure Managed EDI infrastructure comes with 24/7 monitoring, unrivaled customer service and decades of institutional knowledge. With SMC<sup>3</sup>'s no-maintenance, cloud-based service, you can:

- Augment EDI messaging with real-time API data
- Scale messaging requirements with ease to serve your growing business
- Secure reliable communications at a fraction of the in-house cost
