

An Unbeatable Combination: Infios TMS Powered by SMC³ Suite of APIs

About SMC³

SMC³ is the hub for less-than-truckload technology, data and education. SMC³'s hosted technology solutions support the entire supply chain with industry-leading speed, reliability and performance to help optimize LTL freight transportation. As the single integration point for all carrier rate, transit and service information, SMC³ solutions travel beyond simple connectivity and empower shippers, 3PLs and carriers to collaborate and optimize decision making throughout the entire LTL lifecycle — from rating through the invoicing process. SMC³ has a history of industry excellence and business stability, and an unrivaled reputation as a trusted guardian of data security.

SMC³ LTL APIs

SMC³'s API solutions allow freight transportation stakeholders to digitalize the LTL shipment lifecycle from quote to delivery. Through seamless integration to Infios's transportation management system, shippers and 3PLs can:

- Receive contract, volume and dynamic pricing plus transit times, from multiple carriers at the click of a button
- Generate and manage PRO numbers
- Digitally schedule pickups conveniently and quickly, receiving immediate confirmation
- Track and trace in-transit shipments via real-time messaging
- View and download digital PDF documents including bills of lading, weight & inspection certification, proof of delivery, and invoices

By integrating these API solutions with its core offerings like the CzarLite[®] base rate and the RateWare[®] XL and CarrierConnect[®] XL solutions, SMC³ customers command a 360° view of LTL pricing, transit times and carrier services.

SMC³ RateWare XL

The implementation of RateWare XL provides the advantage of a durable rating engine with a library of more than 4,000 data modules. This robust rating simplifies LTL pricing and eliminates the costly tasks of sourcing, programming and maintaining data from multiple carriers. Use RateWare XL to:

- Manage LTL shipment costing and pricing, including carrier-specific discounts, minimum charges, deficit rating and FAK charges, in a streamlined and efficient process
- Quickly and easily convert and validate data through a simplified process for updating motor carrier tariff information and expiration dates
- Support rating requirements with various lookup and discounting activities
- Incorporate CzarLite[®] base rates into logistics platforms

SMC³ CarrierConnect XL

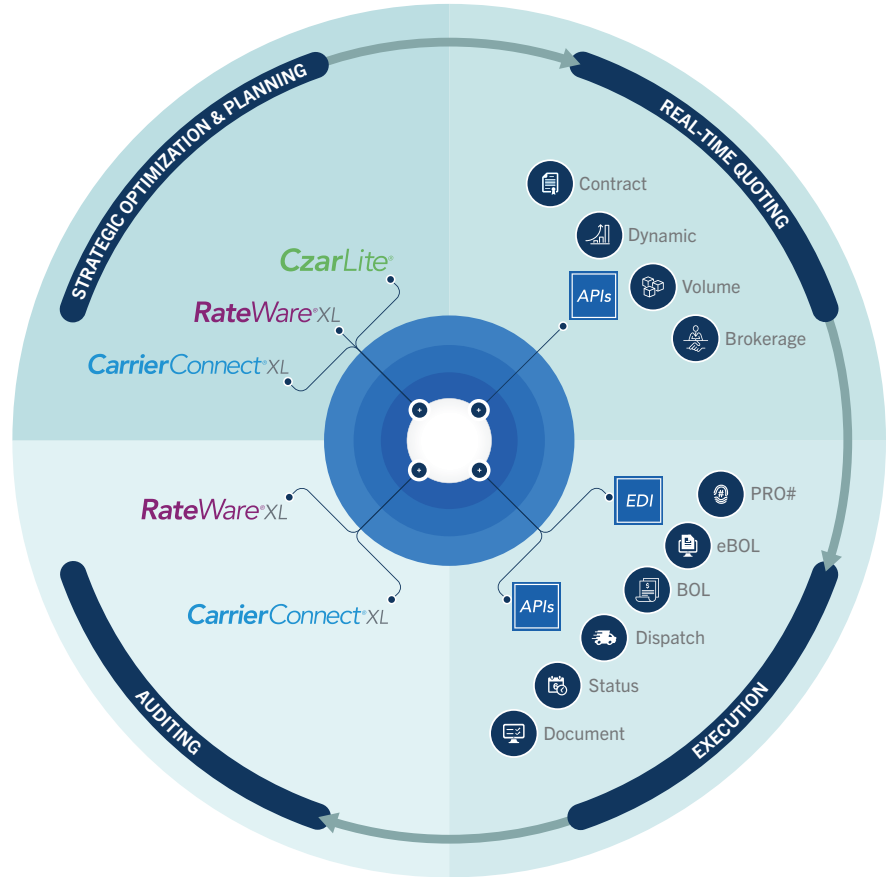

Getting LTL freight to the right place at the right time requires the most accurate and timely information on the front end. CarrierConnect XL compiles and continually updates transit times and service detail from more than 300 leading national, super-regional and regional carriers across North America, letting customers make the best choice for LTL shipments. CarrierConnect XL makes it easy for logistics service providers to:

- Identify carrier operational capabilities, including points of service, transit times and terminal-to-terminal networks
- Compare the full-service portfolios of LTL carriers
- Eliminate transit time and delivery date ambiguity with calendar date or number-of-days modeling, as well as carrier-specific holiday calendars
- Make the most accurate routing decisions using dynamically updated carrier information that reflects real-world operations

SMC³ CzarLite

No matter where goods are shipped in the United States, Canada or Mexico, SMC³ CzarLite base rates provide a flexible decision support tool to assure total pricing visibility. Achieve optimal shipping agreements with a uniform base rate where customers can:

- Simplify business processes like negotiations, contracts and profitability strategies
- Quickly evaluate the impact of carrier rate adjustments and conduct “apples to apples” base rate comparisons
- Assure shipments are rated using timely, accurate, carrier-independent base rates, so the effects of line items such as discounts and FAK classifications are apparent
- Create flexible, borderless international pricing system with stable base rates for freight movements between the U.S., Canada and Mexico
