

## Unbeatable Combination: Revenova Transportation Management Plus Combined LTL Rating and Transit Data

### About SMC<sup>3</sup>

SMC<sup>3</sup> is the hub for less-than-truckload technology, data and education. SMC<sup>3</sup>'s hosted technology solutions support the entire supply chain with industry-leading speed, reliability and performance to help optimize LTL freight transportation. As the single integration point for all carrier rate, transit and service information, SMC<sup>3</sup> solutions travel beyond simple connectivity and empower shippers, 3PLs and carriers to collaborate and optimize decision making throughout the entire LTL lifecycle — from rating through the invoicing process. SMC<sup>3</sup> has a history of industry excellence and business stability, and an unrivaled reputation as a trusted guardian of data security.

### About Revenova

Revenova is a cloud application provider of transportation management solutions for freight brokers, third-party logistics (3PL) companies, carriers, and shippers. Our solutions improve the process of moving freight by aligning customers, carriers, and coworkers more efficiently and intelligently. Revenova's cloud-based solutions and suite of modules deliver unprecedented business results and operational efficiency.

### SMC<sup>3</sup> LTL APIs

SMC<sup>3</sup>'s API solutions allow freight transportation stakeholders to digitize the shipment lifecycle from quote to delivery. Through seamless integration to Revenova's transportation management system, shippers and 3PLs can:

- Access direct-to-carrier pricing APIs to support contract, dynamic, volume and broker pricing (planned for release in early 2025)
- Self-assign PRO numbers prior to pickup
- Digitally schedule pickups and receive immediate confirmation
- Monitor shipments via real-time messaging
- View and download documents including bills of lading, weight & inspection certification, proof of delivery, and invoices

By integrating these API solutions with its core offerings like the CzarLite<sup>®</sup> base rate and the RateWare<sup>®</sup> XL and CarrierConnect<sup>®</sup> XL solutions, SMC<sup>3</sup> customers command a 360° view of LTL pricing, transit times and carrier services.

### SMC<sup>3</sup> RateWare<sup>®</sup> XL

The implementation of RateWare XL enables you to fully realize the advantage of a durable rating engine with a library of more than 3,000 data modules. This robust rating simplifies LTL pricing and eliminates the costly tasks of sourcing, programming and maintaining data from multiple carriers. Use RateWare XL to:

- Manage LTL shipment costing and pricing, including carrier-specific discounts, minimum charges, deficit rating and FAK charges
- Quickly and easily convert and validate data for updating motor carrier tariff information and expiration dates
- Support rating requirements with various lookup and

discounting activities

- Incorporate CzarLite<sup>®</sup> base rates in your logistics platform

### SMC<sup>3</sup> CarrierConnect<sup>®</sup> XL

With SMC<sup>3</sup> CarrierConnect XL you can build a custom carrier selection system or an integrated component that runs alongside RateWare XL to access CarrierConnect XL data and return points of service, transit times and detailed service guide information. The product includes both detailed transit data for carriers and the technology to use the data and interface it to your supply chain applications. The data in CarrierConnect XL includes more than 200 top carriers and allows SMC<sup>3</sup> to provide you with the latest points of service and transit times for national, multi-regional and regional carriers. Data updates are automatic, guaranteeing you the most up-to-date and accurate information.

### SMC<sup>3</sup> CzarLite<sup>®</sup>

No matter where you ship in the United States, Canada or Mexico, SMC<sup>3</sup> CzarLite base rates provide a flexible decision support tool to assure total pricing visibility and empowerment

to make your best LTL purchases. Achieve optimal shipping agreements with a uniform base rate where you can:

- Simplify business processes like negotiations, contracts, payment and costing to enhance operating and profitability strategies
- Quickly evaluate the impact of carrier rate adjustments and conduct “apples-to-apples” base rate comparisons
- Assure your shipments are rated using timely, accurate, carrier-independent base rates, so the effects of line items such as discounts and FAK classifications are apparent
- Create your own flexible, borderless international pricing system with stable base rates for freight movements between the U.S., Canada and Mexico
