Fast and Accurate LTL Carrier Service Data and Transit Times

With a sharply-focused representation of each carrier's services and operating schedules, shippers, third party logistic providers and technology partners can plan and execute transportation operations with a precise approach, minimizing errors and mitigating risk.

Unparalleled carrier transit and service information

CarrierConnect XL provides:

- Access to 300+ industry leading national, super-regional and regional LTL carriers plus select truckload carriers
- Detailed, terminal-level carrier contact information at a glance
- Carrier service points Identification
- Indication of direct and indirect lanes
- North American coverage
- Ability to make accurate routing decisions using updated carrier information

What Does It All Mean?

With much more granular carrier service data available, the CarrierConnect XL new transit engines optimize LTL freight transportation modeling and decision making at a level of speed and accuracy never before possible. And, you are no longer dependent on individual users to update information.
