

A single solution for complete LTL shipment visibility

Digitize the shipment lifecycle

LTL GO is an easy-to-use web application that enables shippers and 3PLs to connect to an array of transportation providers from a single platform, automating the LTL shipment lifecycle from quote to delivery.

With LTL GO, users can harness the power of SMC³ APIs to find pricing information, schedule pickups, check shipment statuses and obtain document images from multiple LTL carriers in real-time.

- Receive contract and spot market pricing with transit times from multiple carriers at the click of a button
- Schedule pickups conveniently and quickly, receiving immediate confirmation from the carrier
- Track and trace in-transit shipments and inventory via real-time messaging
- Automate invoice generation and access digital documents including weight certification, proof of delivery, bills of lading and other critical shipment information

LTL GO helps Shippers and 3PLs:

Save time by eliminating phone calls and website visits needed to monitor vital shipment information

Solve today's problems immediately without technology integration costs or delays

Grow customer loyalty by communicating timely and accurate tracking information throughout the shipment lifecycle
