

Smarter LTL Freight Audits Start Here

Combine the power of five essential tools to automate workflows, speed information and improve accuracy.

What Can the Right Audit Technology Combination Deliver for your Team?

RateWare® Plus

Confident Pricing & Accessorial Management

Take time out of managing and staying up to date with multiple accessorial for many carriers, including high-cost delivery and overlength charges. *Contract management coming soon.*

LTL APIs & EDI

Save Time, Eliminate Manual Workflows & Gain Real-Time Visibility

Access “audit critical” information and documents for faster reconciliation. Leverage EDI invoice 210s directly or receive via API pushed to your system.

CarrierConnect® XL

Real-Time Transit & Service Accuracy

Gain visibility into direct lanes, indirect lanes and guaranteed service day calculations.

BatchMark® XL

High-Speed Freight Cost Analysis

Rerate thousands of bills per minute to retrieve and match base rates for easy calculation of linehaul revenue.

Accurate

Leverage complete shipment data and insights to reconcile and confidently pay for actual services received.

Efficient

Save hours of manual work and gain on-demand access to critical information when needed.

Built for LTL

Harness industry-proven solutions from the premier provider of LTL technology.

“When you’re auditing thousands of freight bills for multiple shippers and LSPs, speed, accuracy and automations make all the difference. SMC³ LTL solutions empower our team with quick, reliable rating, transit and visibility to deliver results faster to our customers.”

– Chad Pumphrey, VP of Rating Architecture, A3 Freight Payment
