ⅤSMC³

End to End Shipment Lifecycle Management

Power your LTL in Dynamics 365 with Supply Chain Cloud Ship

About SMC³

SMC³ is the hub for less-than-truckload technology, data and education. SMC³'s hosted technology solutions support the entire supply chain with industry-leading speed, reliability and performance to help optimize LTL freight transportation. As the single integration point for all carrier rate, transit and service information, SMC³ solutions travel beyond simple connectivity and empower shippers, 3PLs and carriers to collaborate and optimize decision making throughout the entire LTL lifecycle — from rating through the invoicing process. SMC³ has a history of industry excellence and business stability, and an unrivaled reputation as a trusted partner.

SMC³ LTL APIs

SMC³'s API solutions allow freight transportation stakeholders to digitalize the LTL shipment lifecycle from quote to delivery through seamless integration to the Dynamics 365 transportation management system.

• Real time quoting – receive pricing direct from carriers for contract and volume pricing and/or leverage brokerage pricing via API

• Use electronic bill of lading (eBOL) to digitally transmit shipping information to carriers quickly and securely

• Dispatch - digitally schedule pickups conveniently and quickly, receiving immediate confirmation

• Status - track and trace in-transit shipments via real-time messaging

• Advance pro number, status, document and electronic bill of lading (eBOL)

Future planned APIs are available outside of D365 for dynamic rating and documents. By integrating API solutions with CzarLite® base rate, RateWare® XL and other solutions, SMC³ customers command a 360° view of other pricing and carrier services.

SMC³ RateWare® XL

The implementation of RateWare XL enables you to fully realize the advantage of a durable rating engine with a library of more than 3,000 data modules. This robust rating simplifies LTL pricing and eliminates the costly tasks of sourcing, programming and maintaining data from multiple carriers. Use RateWare XL to:

- Manage LTL shipment costing and pricing, including carrier-specific discounts, minimum charges, deficit rating and FAK charges

- Quickly and easily convert and validate data for updating motor carrier tariff information and expiration dates

- Support rating requirements with various lookup and discounting activities

- Incorporate CzarLite® base rates in your logistics platform

SMC³ CzarLite®

No matter where you ship in the United States, Canada or Mexico, SMC³ CzarLite base rates provide a flexible decision support tool to assure total pricing visibility and empowerment to make your best LTL purchases. Achieve optimal shipping agreements with a uniform base rate where you can:

- Simplify business processes like negotiations, contracts, payment and costing to enhance operating and profitability strategies

- Quickly evaluate the impact of carrier rate adjustments and conduct "apples-to-apples" base rate comparisons

- Assure your shipments are rated using timely, accurate, carrier-independent base rates, so the effects of line items such as discounts and FAK classifications are apparent

- Create your own flexible, borderless international pricing system with stable base rates for freight movements between the U.S., Canada and Mexico. For more information on SMC³ and our hosted technology solutions, please contact your SMC³ sales representative or visit: **www.smc3.com**
