

# VOLUME LTL: A FLEXIBLE RATING SOLUTION

## WHAT IS VOLUME LTL?

Volume LTL is an ideal rating solution for shippers and 3PLs shipping larger than LTL (12 linear feet, 6 pallets), but smaller than truckload (53 linear feet, 30 pallets).

Customers pay a spot price for the space their freight occupies, not an LTL contract price tied to classification rating.

## WHY USE VOLUME LTL?

### 1 REDUCE COSTS

Eliminate manual processes, reduce errors and redeploy resources to revenue generating activities with direct-to-carrier communications providing visibility to LTL spot market quotes.

### 2 INCREASE FLEXIBILITY

A rating option for shipments that don't fit LTL or TL standards, volume pricing gives users greater shipping flexibility, including access to additional capacity and backhaul lanes.

## WHY USE SMC<sup>3</sup>?

As the leaders in LTL rating, SMC<sup>3</sup> is the provider of choice for LTL freight APIs and analytical transportation tools. Shippers and 3PLs utilize SMC<sup>3</sup>'s best-in-class rating solutions to optimize their transportation spend, saving time and money on their LTL shipments throughout North America. SMC<sup>3</sup> processes more than 50 million API transactions per day — an unrivaled level of computing power supported by powerful security protocols and redundant data centers.
